

◆ AITHON 2.0

— DEPARTMENT OF ARTIFICIAL INTELLIGENCE & DATA SCIENCE

AITHON

2.0

/ NATIONAL AI HACKATHON

BUILD. • BREAK. • INNOVATE.

◆ 9 OCTOBER 2026

• 12-HOUR HACKATHON

• ₹1,00,000 PRIZE POOL

• 400-500 BUILDERS

AMRUTVAHINI COLLEGE OF ENGINEERING, SANGAMNER

EDITION 01 — 2026

— SECTION 01 — INTRODUCTION

Twelve hours. One idea. **A working product.**

AITHON 2.0 is where students stop talking about ideas and start shipping them. Over one continuous 12-hour build cycle, teams from across disciplines turn a blank repository into a working piece of technology — powered by artificial intelligence, driven by curiosity.

Hosted by the Department of Artificial Intelligence & Data Science at Amrutvahini College of Engineering, Sangamner, AITHON 2.0 brings together builders, designers and problem-solvers for a single day of focused creation — no long pitch decks, no theory, just code, coffee and conviction.

EST. AITHON — EDITION 02

• OPEN TO ALL DISCIPLINES

TOTAL PRIZE POOL

01

CAMPUS, ONE NIGHT

— SECTION 02 — WHY WE BUILD

Six reasons this room is going to be loud.

Innovation

Original thinking over recycled ideas — we reward the unexpected angle, not the safe one.

Problem Solving

Every hack starts with a real problem — clearly framed, honestly scoped, sharply solved.

Artificial Intelligence

AI at the core of every build — as the engine, the co-pilot, or the product itself.

Collaboration

Designers, developers and data folks in one squad — the best builds are never solo acts.

Real-World Impact

Built for people outside the room — solutions judged on who they actually help.

Practical Solutions

Working prototypes over polished slides — if it runs live, it counts. If it doesn't, it's a concept.

— SECTION 03 — THEMES & TRACKS

Pick a track. Or break the map entirely.

Every team chooses a themed track, or enters under **Open Innovation** with a problem statement of their own.

TRACK 01

AI for Healthcare

Diagnostics, patient care, accessibility and medical data tools.

TRACK 02

Agriculture & Rural India

Farming intelligence, supply chains and rural-first design.

TRACK 03

FinTech & Governance

Financial access, transparency and civic-tech platforms.

TRACK 04

Sustainability & ClimateTech

Energy, environment and resource-efficient systems.

TRACK 05

EdTech & Accessibility

Learning tools built for every ability and every background.

OPEN TRACK

Open Innovation

No track fits your idea? Bring your own problem statement.

— SECTION 04 — ELIGIBILITY

If you can build, you can enter.

AITHON 2.0 is open to student builders across colleges and disciplines. A few ground rules keep the playing field fair for everyone.

Any Student, Any Branch

Open to undergraduate & postgraduate students from all streams — engineering, science, design and beyond.

Cross-College Teams

Teams may mix members from different colleges — talent matters more than campus ID.

Valid ID Required

A valid college ID and government-issued ID are mandatory for on-site check-in.

Confirmed Registration

Every participant must complete registration and receive confirmation before Hackathon Day.

ONE TEAM, ONE ENTRY

Each registered team may submit exactly one project. Individuals may be part of only one team for the event.

ORGANIZER’S DISCRETION

The organizing committee reserves the right to verify eligibility and admit or restrict entries at any stage.

— SECTION 05 — TEAM FORMATION

Assemble a squad of two to four.

- 1 2 to 4 members per team**
Solo entries are not accepted — every hack needs a squad.
- 2 One team lead, one point of contact**
The lead handles registration, communication and submissions.
- 3 Mixed skill sets encouraged**
Developers, designers and data folks build stronger products together.
- 4 Team lists lock at registration close**
No swaps or additions once the event begins.
- 5 One idea, one submission**
Every member is credited on a single project — no exceptions.

— SECTION 06 — WHAT YOU CAN BUILD WITH

The build rules, in three columns.

✓ **ALLOWED**

- 01 Any programming language or framework
- 02 Open-source libraries & public APIs
- 03 Internet research during the event
- 04 AI coding assistants & generative AI
- 05 Hardware & IoT components you bring
- 06 Personal boilerplate, if disclosed upfront

✗ **NOT ALLOWED**

- 01 Submitting a pre-built, existing project
- 02 Plagiarized or stolen code
- 03 Proprietary code you don't have rights to
- 04 Undisclosed external development help
- 05 Harmful, unsafe or malicious builds
- 06 Misrepresenting what your team built

⚠ **IMPORTANT**

- 01 All code must be written within the event window
- 02 Every member must be able to explain any part of the code
- 03 Judges may ask live technical questions at any point
- 04 Organizers reserve the right to disqualify for violations

— SECTION 07 — ON THE USE OF AI

Build with AI. Not just on AI.

This is an AI hackathon — using AI tools is expected, not frowned upon.
What matters is what you do with them.

AI as a co-pilot

Use AI coding assistants, generative AI and LLMs to ideate, debug, write boilerplate and speed up your build — freely, and without apology.

You own the outcome

Every line your team submits must be something you understand, can explain, and can defend in front of a judge — no exceptions.

⚠ THE ONE LINE THAT MATTERS

AI is a tool, not a teammate. Blind copy-paste without comprehension is treated as a rules violation — judges will ask, and you'll need an answer.

— SECTION 08 — EVENT-DAY FLOW

From check-in to champion, in eight moves.

Exact clock timings will be shared closer to the event and displayed on-screen throughout the venue. The structure above stays fixed — twelve hours, eight moves, one winner.

— SECTION 09 — HOW WE SCORE

Six criteria. One hundred points.

— SECTION 10 — JUDGING ROUNDS

Three rounds stand between idea and trophy.

— SECTION 11 — WHAT TO SUBMIT

Five things. One final upload.

GitHub Repository

Public, with a clean commit history and README.

Presentation

Problem, solution, tech stack and impact — concise.

Working Prototype

Must run live — no "trust us, it works" builds.

Live Demonstration

A short walkthrough in front of the judging panel.

Documentation

Architecture, tech stack and setup notes.

SUBMISSION WINDOW

All five items must be submitted before the Final Pitch round begins. Late submissions are evaluated at the organizers' discretion.

✓ **ONE CHECKLIST, ONE TEAM**

The team lead is responsible for the final upload. Double-check every link before the submission window closes.

— SECTION 12 — HOW WE TREAT EACH OTHER

Compete hard. Treat people well.

Respect & Inclusivity

Every builder is welcome, regardless of background, identity or experience level.

Professional Behavior

Communicate honestly with mentors, judges and fellow participants throughout.

Zero Tolerance for Harassment

Any form of harassment results in immediate removal from the event.

No Cheating or Plagiarism

Original work only — see the Build Rules for what counts as a violation.

No Disruptive Behavior

Keep the floor safe and workable for every team around you.

Safety First

Follow all venue safety guidelines, including equipment and electrical use.

Follow Organizer Instructions

Volunteers and organizers have final say on the event floor.

Fair Play, Always

Violations of this code may result in disqualification at any stage.

— SECTION 13 — PACK LIST

What to pack for twelve hours awake.

Laptop
Fully charged

Charger
Laptop & phone

College ID
For verification

Government ID
Aadhar / PAN / etc.

NOC
If required by your college

Extension Board
Shared power is scarce

Power Bank
For your phone

Internet Backup
Hotspot / dongle

Special Hardware
Sensors, boards, cables

Personal Essentials
Medicines, toiletries

A Comfort Item
Headphones, a hoodie

Sleep Discipline
Rest when your team rests

— SECTION 14 — WHILE YOU'RE HERE

Fed, rested, and looked after.

Meals & Refreshments

Meals and refreshments are provided through the 12-hour build cycle, with breaks announced on-screen at the venue.

Rest & Break Areas

Designated quiet zones are set up for teams to recharge — physically and otherwise — during the event.

Campus Navigation

Help desks and volunteers are stationed across campus — look for the AITHON 2.0 signage and lanyards.

On-Site Safety

Safety marshals and basic medical support are available throughout the venue for the full 12 hours.

Personal Belongings

Participants are responsible for their own devices and valuables — keep an eye on your gear at all times.

Emergency Contacts

Emergency and helpdesk numbers are posted at every entrance and displayed on-screen throughout the venue.

SECTION 15 – WHAT'S AT STAKE

TOTAL PRIZE POOL

₹1,00,000

2ND RUNNER-UP

Bronze Tier

CHAMPION

Gold Tier

1ST RUNNER-UP

Silver Tier

+ SPECIAL RECOGNITION AWARDS

Best AI Innovation

Best Technical Execution

Best UI/UX

Most Scalable Solution

Social Impact Award

Most Creative Hack

People's Choice

A CLOSING NOTE FROM THE ORGANIZERS

Don't just participate.
Build something that matters.
